PROJECTS

E-Commerce Website

2 Months

The Pizza E-Commerce Website is an interactive and user-friendly online platform that allows customers to browse, customize, and order pizzas. Built using HTML, CSS, and JavaScript, this project provides an engaging UI with real-time interactions to enhance the user experience.

Online Banking Management System

4 Months

The Online Banking Management System is a web-based application designed to provide secure and efficient banking services to users. This system enables customers to manage their accounts, perform transactions, and access banking services online. It is developed using Java (J2EE), JSP, Servlets, MySQL, HTML, CSS, and JavaScript, following the MVC architecture for better scalability and maintainability.
